FCC, I urge you to reject NAB's petition 04-160. I enjoy benefiting from what modern technology has to offer. To restrict satellite radio is outrageous. I pay for this service and when I need local news I tune in to terrestrial radio. As citizens of the DC metro area you know up to the minute traffic information is essential and having to wait 10-20 minutes for an update is disastrous. I need to continous traffic feed XM offers for DC and reject any attempt to restrict my access to the best that American technology can offer. If the NAB has a problem tell them to update their programming, otherwise keep quiet. Thanks,  
Sam Rhem
